#### **FEATURES**

Specially designed for recording courtroom proceedings, conferences or meetings.

#### Dual-deck confer-corder

With the AUTO CHANGE switch ON, long uninterrupted recording is possible. Before the end of tape on deck A (B), recording on deck B (A) starts automatically.

With the AUTO CHANGE switch OFF, both decks A and B can be operated simultaneously or separately.

#### 4-track, 4-channel recording system

Eight microphone inputs into four channels can be recorded simultaneously. (The sound input from two microphones is mixed and recorded on one channel.) Any channel or all can be selected for monitoring.

#### Search functions

A particular recorded segment of the tape can be quickly located and the end of the last recorded segment on the tape can easily be located.

#### Fail-safe warning system

Alarm sound and indication on the counter display prevent recording errors.

#### Recorded cassette protection

Built-in circuitry makes it impossible to record over a recorded segment on the cassette.

#### Digital tape counter and alarm indicator

The tape position (4-digit readout 0000 to 9999) cassette number (1, 2, 3, etc.) during continuous recording and alarm indication appear for easy reference.

#### Transcribing capability

With the use of the optional FS-75 foot control unit, deck B can be used for transcribing.

#### Recording of telephone calls

With the use of the optional RDI-246 telephone interface, up to four telephone lines can be connected for long uninterrupted recording of calls.

Public address and display jacks
A PA (public address) jack and DISPLAY connector (for optional remote display) are provided.

#### Security key lock

A security key locks the cassette holders of both decks A and B

## SECTION 8 ELECTRICAL PARTS LIST

- Due to standardization, replacements in the parts list may be different from the parts specified in the diagrams or the components used on the set.
- Items marked "\*" are not stocked since they are seldom required for routine service. Some delay should be anticipated when ordering these items.
- If there are two or more same circuits in a set such as a stereophonic machine, only typical circuit parts may be indicated and capacitors and resistors in other same circuits may be omitted.

CAPACITORS: MF: μF, PF: μμF.

#### RESISTORS

All resistors are in ohms.
F: nonflammable

#### COILS

• MMH: mH, UH: μH

#### SEMICONDUCTORS

In each case, U: μ, for example: UA...: μA..., UPA...: μPA..., UPC...: μPC, UPD...: μPD... The components identified by mark A or dotted line with mark A are critical for safety.
Replace only with part number specified.
